THREE WEB-BASED MAILING SOLUTIONS FOR USPS POSTAL SERVICES

Future Computer Systems, Inc. (FCSI) combines the convenience of the Internet with the reliability of traditional hard-copy mail to send First Class, Certificate of Mailing when you need proof of mailing, or Certified Mail when you need proof of mailing and delivery.

Scheduled Mail Solution is a solution designed to integrate into your current corporate printing and mailing process, including main-frame applications, with almost no change to existing work-flow or internal processes. A print file and/or data only sent directly to a secure FTP Folder or through an encrypted secure connection located at <https://USCertifiedLetters.webexone.com> is processed, and if received before 11:00 am Central Standard Time your mail is delivered to the USPS Business Mailing Entry Unit the same day, unless it is **Scheduled Mail** for a later date. You choose for each mailing the date to be mail!

Document Upload Solution located at www.uscertifiedletters.com allows users to send mail using MS Word document and MS Excel mailing list. Or send a PDF with your list of recipients. The system merges your data and provides a viewable proof. FCSI merges, prints and mails your letters with no special software needed. All mail is sent the same day if received before 11:00 am Central Standard Time. No setup or monthly access fee and you only pay for what you mail.

Pre-printed Envelopes located at www.usclenvelopes.com is ideal for sending original documents such as contracts, tax returns, or anything to be printed and mailed using USPS Certified Mail. You simply login to your secure account, type in addresses or link your mailing list, and print the system creates an address page along with your USPS reports. Insert your original documents into our windowed envelopes provided, apply postage and mail. No setup or monthly access fee.

With all of our Mailing Solution, the need for the traditional "Green Card" is eliminated by using FCSI's online real-time ETC® - Electronic Tracking Confirmation® web based system, which includes our ERR® - Electronic Return Receipt®. Other services include Coding Accuracy Support Service (CASS), and the USPS E-Signatures service - Optional.

Since the U.S. Postal Service contracted with USCertifiedLetters and first launched these services in March of 2001, as a Sole Source vendor, USCertifiedLetters has processed more than 11,000,000 certified mail pieces for more than 10,000 customers, generating some \$46,000,000 in postage and printing revenue. **Future Computer Systems** remains focused on offering Postal Service customers mailing solutions to meet their communication needs.
